

SANDHILL RIVER WATERSHED DISTRICT

August 2, 1956

Met with the Reis Township Board at the Tupper Bridge "Highway 14". Their request was that where the berm was to extend south 60 ft., it be cut to 40 ft. Army Engineer Billing said he would have to take a major change like that up with the office in St. Paul. We then came back here to my place and called for Mr. Harry Markus at the St. Paul Office of the Corp of Engineers. Mr. Billing talked to Markus, who agreed to take the matter up with her staff and for us to call him the next morning for their findings.

N. J. Mjelde, Secretary
